

# SURFACE TEXTURES

## **TruTexture - For Fuzion's TruNorth Collection**

From the forest to your feet, every detailed textures are created by nature. Your decision for modern naturalness traditional and maximum individuality - for a lifetime. What TruTexture kept from original tree, the aesthetics of wood are incomparable. The high and low around the open knots was left from the lamella air drying process; the

sawn mark texture was created while sawing the wood; the fuming process pushes to the max of rustic aesthetic that promotes the truth of the wood. Every plank was then hand selected and refined through individualisation in traditional craftsmanship. Every TruNorth board is different, for an individual living ambience, as unique as you are.

## **Smooth**

Smooth wood floor texture is a type of hardwood flooring that has been sanded down to create a perfectly smooth surface. There are no brushings or added any kind on the texture. This type of floor is popular among people who prefer a uniform appearance.

### **Hand Sculpted**

Hand sculpted hardwood floor texture can be a great way to add character and personality to your home. Each plank is hand touched by our artisans, and it can be a more durable option than smooth hardwood floors, as the texture helps to hide scratches and dents.

### **Wire Brushed**

Wire brushed texture is created by using a wire brush to remove the soft fibers from the surface of the wood. This exposes the harder, more durable grains, creating a textured surface. Overall, wire brushed wood flooring is a versatile and stylish option that can add character and durability to any home.
